

This is a suggested script for your on-air announcement as a CERN volunteer monitor. As a general rule, please make this announcement at the top of the hour at the beginning of your watch, but feel free to modify this to fit your personality:

“This is (your name and call sign) monitoring the **Colorado Connection frequencies**, for the **next hour**, to answer **any call for help**. But if you have an **emergency** please say “**Mayday**” three times in quick succession. This **volunteer service** is organized by the **Colorado Emergency Reporting Net**, meeting every evening at **6:30 pm** on this frequency, and **everyone is welcome**.
